

COLD SIZING

PULCRA OFFERS THE COOL SOLUTION!

Your specifications as a textile producer are to save time, energy and costs...?
In addition, you care about leaving a better environmental footprint?

Cold sizing, a proven product group from Pulcra, has what it takes to meet all these requirements:

AVIROL® is a liquid-based product series that has one major advantage: It can be applied to yarns on the sectional warping machine without steam and drying, simply at room temperature. This saves production time, especially energy, and also enormously reduces the wastewater load during desizing.

Another advantage is ... with Pulcra's know-how in this field, you get the opportunity for collaborative development of suitable cold sizing for new, innovative and challenging materials. **Did we arouse your curiosity?**

Below you will find some key figures on our AVIROL® cold sizes. We look forward to hearing from you and to developing new projects hand in hand!

PRODUCT NAME	APPLICATION	LUBRICITY	ADHESION
AVIROL® 4007 N	if lubricity is your focus	● ● ●	○ ○ ○
AVIROL® KW 79	if a little addition of adhesion is required	● ● ○	● ○ ○
AVIROL® AEK	if adhesion is the focus and lubricity is helping on top	● ● ○	● ● ●
